SUMMARY

I am a resolute and pragmatic problem-solver. I thrive working independently and in teams because I am a sensitive and resolute person. Being patient has enabled me to remain productive in situations that simultaneously pull me in different directions.

PROJECTS

Pantry Pal

- Built by a team of two developers, myself and a colleague
- Harnesses the Google Maps API, to geolocate users on load
- Displays the information of over 2,500 organizations providing free food in the US
- Pulls custom data from MongoDB to display organizations based on user location

Buddystock

- Designed and developed, from prototype to early deployment on my own
- Integrates features based on client specifications, including deployment through Cpanel
- Used git version control to update the client about the status of the project asynchronously

Collabo

- This application was brought to production by five developers, on a one-week sprint deadline
 - Browser-based vanilla JavaScript application that harnesses the Web Audio API
 - Brings remote collaborative songwriting to the public
-
