## SUMMARY

I am a dynamic, solution-focused Full Stack Software Engineer with a demonstrated history of delivering impactful applications. I excel both independently and collaboratively. My resilience and focus allow me to remain productive in dynamic environments. My approach to every project is rooted in a sharp problem-solving mindset, consistently aiming to deliver top-notch results.

---

## PROJECTS

### Pantry Pal

- Spearheaded the development of a geolocation application, harnessing the power of the Google Maps API, to seamlessly track and display information for over 2,500 US organizations offering free food services.
- Innovatively engineered a data-driven solution, utilizing MongoDB, to cater personalized results to users based on their geographic location.
- Successfully integrated Google Maps API and MongoDB to create a robust platform capable of efficiently managing and delivering pertinent information to users in real time.

### Tally Ho

- Implemented Google Waypoints and JavaScript Maps API to enhance user capabilities for planning and saving road trip routes, adding precision and valuable features to the application.
- Demonstrated technical prowess, attention to detail, and a commitment to delivering a feature-rich experience for road trip enthusiasts.
- Leveraged advanced features of Google Waypoints and JavaScript Maps API to elevate the utility of the application, providing users with comprehensive tools for route planning and navigation.

### Collabo

- Showcased proficiency in fundamental web technologies by employing vanilla JavaScript, CSS, and HTML to ensure seamless functionality and user experience.
  - Leveraged the capabilities of the Web Audio API to enable real-time collaboration among users, fostering creativity and innovation in the songwriting process.
  - Demonstrated a commitment to accessibility and inclusivity by designing the application to be user-friendly and intuitive for musicians of all skill levels, further democratizing the songwriting experience.
- 

## SKILLS

- |                           |                |                           |
|---------------------------|----------------|---------------------------|
| • TypeScript & JavaScript | • SQL & NoSQL  | • Git version control     |
| • React                   | • NodeJS       | • Python                  |
| • HTML & CSS              | • RESTful APIs | • Test Driven Development |
- 

## EDUCATION

Alchemy Code Lab | 2023

San Francisco State University | 2008

---

## PROFESSIONAL HISTORY

### **Co.Lab | Software Developer | 2023**

- Designing and developing software applications
- Collaborating with cross-functional teams to define, design, and ship new features
- Writing clean, maintainable, and efficient code
- Troubleshooting and debugging issues in existing software
- Implementing software solutions according to user requirements
- Conducting code reviews and providing constructive feedback
- Participating in the full software development lifecycle, including requirements gathering, design, coding, testing, and deployment
- Documenting software design, technical specifications, and test plans
- Working closely with product owners to prioritize tasks and meet project deadlines
- Staying up-to-date with emerging technologies and industry trends

### **K & L Gates LLP | Practice Assistant | 2021**

- Maintaining and organizing files and documents.
- Preparing legal documents and correspondence.
- Scheduling appointments and managing calendars.
- Answering phone calls and taking messages.
- Distributing incoming mail and managing outgoing mail.
- Assisting in client communication and correspondence.
- Researching and analyzing legal information.
- Assisting with billing and invoicing.

### **James F. Ambrose PC | Legal Assistant | 2017-2021**

- Organizing and maintaining legal documentation and files.
- Assisting with legal research and writing.
- Preparing and proofreading legal documents.
- Assisting attorneys in drafting contracts and agreements.
- Managing and scheduling appointments and court deadlines.
- Communicating with clients and other legal professionals.
- Preparing exhibits and evidence for trial.
- Organizing and coordinating document production and discovery.
- Providing general administrative support to the legal team.
